

Crema-Nuova-Marble-Polished

Crema Nuova Marble (also known as Turkish Crema Marfil or Crema Nova Marble) is a highly popular beige coloured natural stone tile. Honed finish gives a smooth and non-slippery surface making them suitable in any interior or exterior usage. Due to popularity of Crema Marfil marble in the past decade, equivalents are also of high demand. Its beige colour appeals most to people who are not used to natural stone tile shades and also fits best to projects where a beige colour is preferred. We also have Crema Nuova marble polished in stock.
