

Crema-Marble-Polished-Mix-Mosaics

Finally we are extending the very sought after marble mosaics portfolio with polished marble mosaics. These marble mosaic tiles are made of crema golden and beige marble pieces, mixed evenly and randomly with black marble polished mosaic pieces. Polished mixed marble mosaics can be used as a border to any beige, creamy color natural stone, as well as an elegant choice for a mosaic floor and walls in living areas, kitchens and bathrooms. The mosaic pieces are glued to a foot square mesh base and can be cut to size easily when needed between the mosaic pieces.
